

Highlights

SEQUOIA PARK

GIANT FOREST

The only plowed trail is a short stretch near the General Sherman Tree. Still, there is plenty to see from road-sides, or give skis or snowshoes a try;

you don't need to go far or fast. It is a great way to enjoy the sequoia forest in a very different style! Rent them at Wuksachi Lodge, two miles (3.2km) north of Lodgepole. Purchase a ski trail map, ask a ranger for details, and carefully follow the yellow triangular markers on trees.

Review safety advice on page 5. Carry a map, warm clothes, sun-

glasses, and water. Orient yourself before heading out and tell someone where you are going. You are on your own in the winter woods!

Walkers & snowshoers: Avoid walking in ski tracks. It makes them dangerous for skiers.

Watch for wildlife tracks in the snow. Bear, deer, mountain lions, martens, weasels, coyotes, and squirrels may be active all winter.

Get to know the snow forest: This forest was designed for snow. Most trees are cone-shaped, minimizing the amount of snow that catches on them. The branches are flexible, so that they bend to dump what snow does stick when it gets too heavy. Conifer needles are tough and slippery, so snow tends to slide off easily.

GIANT FOREST MUSEUM: If you want to get to know sequoias, don't miss the exhibits here!

GENERAL SHERMAN TREE: A short walk to the world's largest tree, named in 1879 by a Civil War veteran. Park on the west side of the Generals Highway two miles (3.2 km) north of the Giant Forest Museum, and carefully cross the road. The trail from there is not fully plowed, but snow is usually packed down enough to walk on it.

BIG TREES TRAIL: ♿

This 2/3-mile (1km) trail circles Round Meadow. Colorful trailside panels describe sequoia ecology. Park at Giant Forest Museum and ski or snowshoe along the trails on either side of the road (not *in* the road). If there's no snow, it is wheelchair-accessible all the way from the north end of the museum plaza, around the meadow, and back.

ALONG MORO ROCK/ CRESCENT MEADOW ROAD / SKI TRAIL

This 3-mile (5 km), dead-end road closes in winter and becomes a ski and snowshoe trail. It begins at the Giant Forest Museum on the Generals Highway, explores the southwest portions of the sequoia grove, and ends at Crescent Meadow. Some highlights include:

MORO ROCK: A granite dome with a steep 1/4-mile (.4 km) staircase to the summit (300 foot / 91 m elevation gain). Don't climb if there is any ice or snow on the stairs; it is very dangerous. A spectacular view of the Great Western Divide and the western half of the park. 2 miles (3.2 km) from the Generals Highway.

TUNNEL LOG: A fallen sequoia that was tunneled through. The only "tree you can ski through" in these parks. 2.7 miles (4.3 km) from the Generals Highway.

CRESCENT MEADOW

Several trails connect here. It is 1 mile (1.6 km) from here to Tharp's Log, the hollow fallen sequoia lived in by Giant Forest's first settler. The summer High Sierra Trail runs 71 miles (114 km) to Mt. Whitney (highest peak in the lower 48 states - 14,494 feet / 4417 m).

MINERAL KING CLOSED IN WINTER

The winding, steep road to this valley, closed November to late May, ends at 7800' (2380m), the park's highest road. Skis or snowshoes are required to visit in winter.

THE FOOTHILLS

The Sierra's lower elevations offer wonderful winter visits - green and usually snowless! They have more biological diversity - different kinds of plants and animals - than the conifer forests or highcountry. Flowers appear by late January. Watch for ticks and poison oak on foothills trails.

HOSPITAL ROCK PICNIC

AREA: Western Mono people once lived here; exhibits offer insight into their lifestyle. A very short trail built by the Civilian Conservation Corps leads to a waterfall. Be careful: Drownings have occurred here.

MARBLE FALLS: This trail climbs 3.9 miles (6 km) through chaparral to a lovely cascade. Park near site #14 at Potwisha Campground. Follow the dirt road across the concrete ditch. Watch for the trail along the steep bank to the right.

PARADISE CREEK: Park at Hospital Rock and walk to Buckeye Flat Campground. Follow the footpath across from site #26 & cross the footbridge over the Middle Fork. The trail then follows Paradise Creek, not the Middle Fork, for just over 1-1/2 mile (1.6 km) before growing faint.

MIDDLE FORK: Leading through chaparral to highcountry, the first miles offer views of Moro Rock and Castle Rocks. Park at Hospital Rock. Walk toward Buckeye Flat Campground and turn left on the dirt road before the campground. Go 1.3 miles (2 km) to a parking area. Panther Creek Falls is 3 miles (5 km) beyond that.

SOUTH FORK

These trails start at tiny South Fork Campground, at the end of a 13-mile road that leaves Highway 198 at the west end of Three Rivers. This partly unpaved road can be very slippery when wet.

LADYBUG: Hike along the South Fork of the Kaweah in the upper foothills (moderately steep). From the campground, cross the river via footbridge. The trail ends 3 miles (5 km) up at one of the lowest-elevation sequoia groves.

GARFIELD: A relatively steep 5 mile (8.3 km) one-way climb to Garfield sequoia grove. Start on the south side of the river in the campground.
